Message...

India has many favourable factors for rapid development of industries. India is rich in natural resources, such as minerals, forests, fisheries etc. required for the development of industries. The second aspect is commercial crops, such as sugarcane, raw cotton, raw jute, tobacco, oil seeds etc. required for the development of agro based industries and the last phase is power resources, such as coal, hydroelectricity, atomic energy etc. required for turning the wheels of industries.

Council of State Industrial Development & Investment Corporations of India (COSIDICI) through its member corporations which include all the SLFIs has contributed immensely towards the rapid development of industries in all the above fields thus helping in the economic development of the country.

I extend my best wishes for bi-monthly Journal titled **"COSIDICI Courier"**, a great success.
